

MUHAMMAD USMAN

Flutter Developer

m.usman.dev11@gmail.com | +92 302 5509362 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Flutter Developer with 3+ years of experience building and shipping 7+ production mobile applications for Android and iOS, collectively serving thousands of end users. Proficient in Dart, Firebase, RESTful APIs, and state management (Provider, GetX). Skilled in agile teams, delivering scalable, maintainable code that improves performance and user experience. Recognized for strong cross-functional collaboration and a consistent record of on-time, reliable delivery across diverse domains including healthcare, fintech, fitness, and e-commerce.

SKILLS

- Languages & Frameworks: Dart, Java, Android, Flutter
- UI/UX & Design: Material Design, Responsive Layouts, Custom Widgets, Theming, User Flow Optimization
- State Management: GetX, Provider
- API & Backend Integration: RESTful APIs, Firebase (Auth, Cloud Firestore, FCM, Realtime Database, Storage), Socket.IO, Third-party Libraries
- Maps & Location: Google Maps API, Real-Time Location Tracking
- Payments & E-commerce: Stripe Integration, Subscriptions
- Database Management: SQLite (SQFlite), Hive
- Version Control & Deployment: Git, GitHub, Code Review, CI/CD, Google Play Console, Apple App Store, Release Management, OTA Updates

WORK EXPERIENCE

Flutter Developer — iTitans

June 2025 – Present

- Contributed to 3+ high-impact Flutter projects across different domains, demonstrating strong adaptability and versatility in diverse development environments.
- Collaborated closely with senior developers to refactor app architecture, improving code maintainability and reducing bug reports by an estimated 20%.
- Integrated 10+ RESTful APIs, Firebase services, and third-party packages to extend app functionality and deliver seamless, responsive user experiences.

Flutter Developer — Knarkz Solution Limited

Nov 2023 – June 2025

- Delivered 7+ Flutter applications end-to-end across healthcare, fintech, fitness, and e-commerce domains, showcasing strong adaptability and technical versatility.
- Collaborated closely with senior Flutter developers to optimize app performance, reducing load times by up to 30% through efficient state management and clean architecture.
- Integrated 15+ REST APIs, Firebase services, and third-party packages to enhance app features, reliability, and functionality.
- Followed agile methodologies with 2-week sprint cycles, improving delivery predictability and supporting effective cross-functional teamwork.

PROJECTS

Med Legal Safe Keep (Flutter) [iOS](#) | [Android](#)

Secure mobile app for storing and sharing medical and legal data, used by patients and legal teams. Developed real-time health data integration (Health Connect), secure document management, and controlled access via QR code/link sharing, cutting manual document retrieval time significantly.

DogPro Xpress (Flutter) [iOS](#) | [Android](#)

Mobile app connecting dog owners with professional trainers worldwide. Built real-time chat, virtual training sessions, and a scheduling system, streamlining bookings for 100+ trainers and their clients.

Gear Up MMA (Flutter) [iOS](#)

Mobile platform making MMA training more accessible and flexible for fitness enthusiasts. Built features supporting on-demand training, user engagement, and seamless class access, improving member retention through a smoother booking flow.

Customer 5 Star (Flutter) [iOS](#)

Roofing project management app enabling users to track project progress, manage documents, and communicate with teams in real time. Implemented estimate approval, e-signature contract signing, and secure invoice payments, reducing project turnaround time.

Casting Space (Flutter) [iOS](#) | [Android](#)

Community-driven app for 1,000+ professionals in the film and production industry, enabling users to connect, collaborate, and manage their work more efficiently.

ScrapThat (Flutter) [iOS](#) | [Android](#)

App promoting responsible metal recycling, enabling accurate scrap value estimation and helping users track environmental impact through measurable CO2 savings.

LetZero (Flutter) [iOS](#) | [Android](#)

App enabling landlords and tenants to monitor and control radiator-based heating via QR code integration. Implemented AI-driven energy usage tracking, predictions, and insights that helped users reduce energy costs by up to 15% without additional hardware.

EDUCATION

BS Computer Science — The Islamia University of Bahawalpur

2019 – 2023
